

Ultrabooks, super phones, and really thin TVs.

The Consumer Electronics Show invites RC3n in covering the release of every newest electronics gizmo.

CES is a monster showing of bleeding edge coming out in the new year. Everything you need in new laptops, phones, audio, and video. Throw in the unexpected talking fridge, bedazzling light bulb, and mind reading computer.

Piccys in this topic are blazing hot. This moment, there's a [good scoop in the photostream](#) .
